**[Cooperative Internship 2024] Security Analyst Intern, Security team**

**Apply Now**

Company: Agoda

Location: Bangkok

Category: other-general

**The Opportunity:**

Agoda's IT-Security team is looking for fast learner and a highly motivated Security Analyst Intern looking to jumpstart their career in an exciting, highly rewarding IT-security domain. You will work for IT-security team at Agoda helping in keeping the company secure by keeping the bad guys out. You will get the opportunity to work, collaborate and learn from experienced IT-security defenders and help create a safer Agoda by protecting against internal and external attacks. You bring the basics and motivation, and we will take care of your training and education. If you like to learn new things every day, apply and work with us.

**In this Role, you'll get to:**

Learn how to use security tools such as EDR, Email security, network security to track, analyse, contain, and flush out attackers from the network.

Assist with daily activities and functions of the security team to help update and maintain documents, policies, procedures

Learn to read and analyze log data to identify suspicious patterns and identify potential security threats

Provide first level security alert monitoring and contribute to triaging security investigations.

Thalyze phishing emails and learn how attackers work and how to identify their traces in the company

Automate repetitive tasks that help speed up triaging security incidents

Assist in building security awareness training material and documenting security incidents

Participate in investigating large scale security incidents in a fast moving, agile environment

**What you'll Need to Succeed:**

Currently pursuing a degree in computer science, IT or a related field of study

Fundamentals of IT security, good knowledge of Windows and Linux operating systems

Good knowledge of Windows and Linux operating systems and the TCP/IP stack

Enthusiasm to build a career and learn something new every day in the domain of cyber defense and IT security

Fluency in written and spoken English

**It's Great if you have:**

Good programming skills in any language of your choice.

Experience in log analysis, using security tools or keen interest in cyber security

Exposure to concepts of networking, cyber security via formal education in university or self-learned.

Ability to work under high pace, fast moving environment
