

## Data Engineer

Apply Now

Company: Rapida Solutions

Location: Bangkok

Category: computer-and-mathematical

**Responsibilities:** Design, develop, and maintain ETL processes to efficiently extract, transform, and load data into cloud data warehouses (GCP, Redshift, Snowflake, or Synapse). Collaborate with stakeholders to understand data requirements and translate them into scalable and efficient data pipelines. Implement and maintain dimensional modeling techniques to ensure data accuracy and consistency. Develop and maintain Power BI (or similar technology) dashboards and reports to provide insights and facilitate data-driven decision-making. Stay updated with the latest trends and technologies in data engineering and contribute to the continuous improvement of data processes and systems.

**Requirements:** Bachelor's degree in Computer Science, Engineering, or a related field. Proven experience 3 years working as a data engineer or similar role. Strong proficiency in ETL development, including data extraction, transformation, and loading. Experience working with cloud data warehouses such as GCP, Redshift, Snowflake, or Synapse. Proficiency in SQL, dimensional modeling techniques and database design principles. Experience with Power BI or other business intelligence tools is a plus. Excellent problem-solving skills and the ability to work effectively in a collaborative team environment. **Why Join Us:** Opportunity to work with cutting-edge technologies and make a meaningful impact on our clients' businesses. Collaborative and inclusive work culture that values creativity, innovation, and continuous learning. Competitive compensation package and opportunities for professional growth and advancement. Flexible work arrangements and a supportive work-life balance. **How to Apply:** Interested candidates are encouraged to submit their resume and a cover letter detailing their relevant experience and qualifications: <https://rapida.com.au/about-us/careers/>
