Company: Michael Page

Location: Bangkok

Category: other-general

Global consulting firm

Various clients of different industries

About Our Client

Our client is a global management consulting firm providing services to clients of various industries. Strategic solutions provided include digital and finance transformation, IT strategy implementations, ERP advisory and more.

Job Description

Client Engagement: Work closely with clients to understand their data needs and requirements. Provide data engineering expertise, develop data strategies, and recommend technical solutions aligned with their business objectives.

Project Management: Lead end-to-end data engineering projects, from scoping and planning to execution and delivery. Ensure projects are completed on time, within budget, and meet client expectations.

Team Leadership: Manage a team of data engineers, assigning project tasks, providing guidance, and fostering a collaborative and high-performance work environment.

Data Architecture and Modeling: Design scalable and efficient data architectures and data models that support data integration, processing, and analytics requirements.

ETL Development: Develop robust and reliable Extract, Transform, Load (ETL) processes to ingest, clean, and transform data from various sources into data warehouses or data lakes.

Data Quality and Governance: Establish and enforce data quality standards and governance policies. Implement data validation processes and controls to ensure data accuracy, consistency, and compliance.

Technical Expertise: Stay up-to-date with the latest data engineering technologies and tools. Provide thought leadership and expertise in areas such as cloud-based data platforms, big data technologies, data streaming, and data pipeline orchestration.

Collaboration and Communication: Collaborate effectively with cross-functional teams, including data scientists, business analysts, and stakeholders. Communicate complex technical concepts to non-technical audiences in a clear and concise manner.

Continuous Improvement: Identify opportunities for process optimization, automation, and efficiency gains. Drive best practices adoption and mentor junior team members to enhance their skills and capabilities

The Successful Applicant

Bachelor's or Master's degree in Computer Science, Engineering, or related field.

Strong data engineering experience, including data architecture, modeling, and integration.

Previous leadership or managerial experience, with a proven track record of team management and development.

Proficiency in Python, SQL, and experience with data processing frameworks like Apache Spark or Hadoop.

Familiarity with data warehousing concepts and cloud-based data platforms (AWS, Azure, GCP).

Knowledge of data visualization tools (Tableau, Power BI) and data pipeline orchestration tools (Apache Airflow) is a plus.

Strong problem-solving and analytical skills, translating business requirements into technical solutions.

Good communication skills in both Thai and English

What's on Offer

Competitive salary

Career advancement opportunity

Social Security

Health Insurance
