Job Description

We are looking for a Front-End Web Developer who is motivated to combine the art of design with the art of programming. Responsibilities will include translation of the UI/UX design wireframes to actual code that will produce visual elements of the application. You will work with the UI/UX designer and bridge the gap between graphical design and technical implementation, taking an active role on both sides and defining how the application looks as well as how it works.

Responsibilities

Develop new user-facing features

Build reusable code and libraries for future use

Ensure the technical feasibility of **UI/UX designs**

Optimize application for maximum speed and scalability

Assure that all user input is validated before submitting to back-end

Collaborate with other team members and stakeholders

Skills And Qualifications

Proficient understanding of web markup, including HTML5, CSS3

Basic understanding of server-side CSS pre-processing platforms, such as LESS and SASS

Proficient experience in Gulp

Proficient in responsive and adaptive design concepts

Proficient understanding of client-side scripting and JavaScript frameworks, especially Angular JS (Knowledge of Angular 5 and TypeScript, Vue JS and React JS is a plus)

Good understanding of asynchronous request handling, partial page updates, and AJAX

Basic knowledge of image authoring tools, to be able to crop, resize, or perform small adjustments on an image. Familiarity with tools such as Gimp or Photoshop is a plus.

Proficient understanding of cross-browser and cross platform (MAC vs PC) compatibility issues and ways to work around them.

Proficient understanding of code versioning tools, such as Git / Mercurial / SVN

Good understanding of SEO principles and helps ensure that application will adhere to them.

Good command of English both speaking and writing.
