Java Developer [Spring Boot]

Apply Now

Company: RECRUITdee

Location: Bangkok

Category: other-general

Job Description

Key Responsibilities:

Work in an agile team to build / develop features and technologies across various aspects of the Java stack, primarily focused on Spring Boot and Spring Cloud / NetflixOSS.

CI/CD deployments on a Kubernetes based platform, both on premises and on a multi-cloud infrastructure. (AWS)

Possess an understanding of cloud-native architectures, and be familiar with implementations involving service discovery, circuit breakers, client side load balancing, and other architectural patterns related to elastic infrastructure.

Participate in, and help create, a company culture which attracts, retains, and coaches other engineers. The primary deliverable of a senior engineer are more senior engineers.

Conduct design and code reviews.

Provide specific technology expertise to help drive innovation.

Identify emerging technologies to create leading edge banking products

Partnering with architects and platform engineers to build strategies for execution, drive and facilitate key decisions, and influence others and lead change where appropriate.

Skills:

Experience with some of below technologies:

Core Java 8,9, Spring Boot, Spring Cloud, NetflixOSS

RabbitMQ, Kafka

AWS

API Gateway

Linux

CI/CD (Jenkins, Git)

Experience with distributed architectures, SOA, microservices and Platform-as-a-Service (PaaS).

Experience with Agile and Test Driven Development (TDD) methodologies.

Familiarity with containers and their technologies such as Docker.

Experience with high availability, high-scale, and performance systems.
