

Lead Back-End Engineer (Node.JS)

[Apply Now](#)

Company: PRTR

Location: Bangkok

Category: other-general

PRTR is partnering with this award-winning solution vendor for the automotive industry which builds in-house business software applications to help drive the business forward. We are searching for a Lead Backend JavaScript Engineer who has experience creating modern software applications in Node. JS. You will be responsible for developing efficient and elegant code to help build solutions and applications used by customers in the automotive industry.

Responsibilities

Building and developing web applications.

Hiring and building a high-performance software engineering team.

Performing the code reviews.

Researching the current and emerging technologies.

Developing the best practices to improve productivity.

Developing high-level product specifications with attention to system integration and feasibility.

Ensuring software meets all quality, security, modifiability, extensibility requirements, etc.

We are looking for someone who has the following qualifications and experience

Bachelor's Degree in Computer Science, Computer Engineering, or similar.

5+ years of hands-on software development experience. 3+ years **backend**

JavaScript experience using **Node.JS** and **Express**.

2+ years of experience contributing to **architecture and design** (architecture, design patterns, reliability, and scaling) of new and current systems.

AWS experience.

Strong object-oriented design, design patterns, and working knowledge of data structure and algorithms.

If this role of Lead Backend JavaScript Engineer sounds of interest and you would like to have a casual discussion to learn more then please apply with your most up-to-date CV as we are short-listing immediately.
