PHP Symfony Developer

Apply Now

Company: DMG

Location: Bangkok

Category: computer-and-mathematical

At THISIS! DMG we are hungry for opportunities to improve the digital world.

As a service provider our clients benefit from our unique ability to think beyond technology and design to make their business more efficient. Our client relationships are based on our shared values of respect, thinking beyond, and responsiveness. While we see ourselves as experts in the digital field, we are always learning, always challenging our thinking, and always looking for the next big step to improve businesses. Thats why we believe that the perfect candidate will challenge the status quo on a daily base while bringing exciting projects to

life.

We are hungry for more join us if your appetite is big enough.

As a**Symfony Developer**you will be responsible for customizing, building, and deploying ERP, CRM, CMS and API platforms and integrating them with various input and output channels.

Tasks

Your most important task is to help your team deliver good software projects and platforms that the whole team is proud of. This can include the following tasks:

Analyzing user requirements to inform application design

Integration of user-facing elements developed by front-end developers

Build efficient, testable, and reusable PHP modules

Build and enhance client DXP, CMS and eCommerce solutions to match project

specifications

API-based data integration development, and testing

Provide troubleshooting and root cause analysis for issues

Requirements

4+ years of PHP development experience; PHP is your strongest skill, but you also know the basics of front-end technologies

Excellent experience in working with Symfony.

Ability to create database schemas that represent and support business processes

Familiar with RESTful, JSON, HTML5, CSS and Javascript/Typescript

Passion for writing clean, readable and scalable code with performance in mind

Good understanding of object-oriented design and programming concepts

Experience in Agile software development methodology

Self-starter can work with minimal supervision

Perfect fit if you already know about Git, Continuous Delivery, and DevOps

Good English in Speaking and Writing

Benefits
Career & Continuing Education

Benefiting from success together: For compensation, we follow the principle of good pay for good performance. Our maxim is: Profit from success together. That's why performance-based compensation systems play a crucial role for us - even outside the upper management levels.

We support your further development: For on-the-job learning, we offer the DMG Academy, a mentoring program and advanced internal training.

Step by step to the top: Regular evaluation and employee appraisals

Individualized

Individualized working hours and working time models: You are free to choose when you work, around the 2 hour core hours. We offer part-time and full-time positions as well as flexible changes in between.

Individualized work locations: We support you in freely choosing your work location - you decide from where you work with us, worldwide.

Individualized benefits: Extended health insurance, also worldwide - support for private pension plans.

Individualized support for home/remote office

What we do?

The next big thing: We are doing today what customers will see as innovative tomorrow. Topics like generative AI and LLMs are currently innovative topics we are working on.

Our Groundwork: We implement B2B and B2E digital projects for our clients.

Our style: We work on projects worldwide with teams of over 15 nationalities, our working language is English, we work on topics that move our clients forward and our people are good at finding the most efficient solution.
