Senior Database Developer, Product Support Team (Bangkok based, relocation provided)

Apply Now

Company: Agoda

Location: Bangkok

Category: other-general

The Opportunity:

As a member of the Database Development team, you will engage in database design, data management, and database development, all integrated with automated Continuous Integration/Continuous Delivery (CI/CD) pipelines. We work in close coordination with product teams, ensuring to offer support and solutions that uphold technical excellence and fulfill business needs.

In this Role, you'll get to:

Assist in designing database schema and architecture

Provide high-quality database development and design solutions

Develop database SQL code with quality and performance optimization

Collaborate and communicate with the product and other teams such as data service, dev-ops, and database operation

Utilize automated database CI/CD pipelines to streamline the development process

Actively and consistently suggest enhancements for services and processes

Understand the complexities of database architecture

Keep up-to-date with advancements in database technology

What you'll Need to Succeed:

At least 4 years of experience in database development with platforms like Microsoft SQL, Oracle, etc.

Bachelor's degree in Computer Science, Information Systems, Computer Engineering, or a related field

Skilled in relational databases with the ability to write advanced SQL queries

Advanced understanding of MSSQL Server, with proficiency in query optimization and knowledge of execution plan principles being beneficial

Proficient in English with excellent writing and verbal communication skills

A multitasker with problem-solving capabilities, quick to learn, and eager to acquire knowledge in both technology and business domains

Well-organized and methodical, with the ability to prioritize tasks and produce results within tight deadlines and in high-pressure environment

A collaborative team player

Comfortable working in a diverse, multicultural team setting

It's Great if you have:

An understanding of CI/CD frameworks and the associated best practices, including build automation and source control management

Familiarity with, and the ability to optimize, PostgreSQL are advantageous skills

Experience with automation platforms such as Gitlab and containerization with Docker

Uderstand of Agile methodologies and a comprehensive knowledge of the software development lifecycle

Familiarity with NoSQL databases and concepts for handling unstructured data

Knowledge of data warehousing, ETL processes, and business intelligence tools

This position is based in Bangkok, Thailand (Relocation Provided)
