Company: Strike Social

Location: Thailand

Category: other-general

Senior Test Engineer Job Overview We are looking for a hands-on Senior Test Engineer to join our growing team of technical experts, where you will have the opportunity to establish test automation for our applications, services, and data pipelines to ensure product quality is continuously improving. The test engineer will work closely with the business team and development team to oversee all aspects of quality assurance including establishing processes, building automation tools, and applying industry best practices. The right candidate will be excited by the prospect of driving quality initiatives at Strike to support our current and the next generation of products.

Responsibilities Ensure the releases of applications, services, and data pipelines meet the expected requirements and standards Analyse business and technical requirements, identify testing strategies, and automate verification process to improve efficiency, reliability and reduce bugs Execute a combination of manual, exploratory, and automated testing Mentor other team members in testing methodologies, best practices and standards

Qualifications 4+ years of experience in quality assurance and automated testing Strong technical skills in manual and automation ideally in a continuous delivery environment Strong understanding of current web and API testing methodologies Fluent in at least one high level programming language such as Python, Javascript or Java Familiarity with database technologies and proficiency in SQL Excellent written and verbal communication skills in English Experience in one or more testing tools and frameworks such as Cypress, Selenium, Robot framework or JMeter

Who we are Strike Social harnesses the power of artificial intelligence to drive the best outcomes in YouTube and social media advertising. We are a leader in the fast growing marketing technology

sector. Come help build the next generation of advertising softwares and services using machine learning technologies including real-time analytics, experimental modeling on the Strike Marketing Cloud/Data Warehouse.
