

## Software Engineering Manager

[Apply Now](#)

Company: PRTR

Location: Bangkok

Category: other-general

PRTR is partnering with this award-winning solution vendor for the automotive industry which builds in-house business software applications to help drive the business forward.

We are searching for a Software Engineering Manager who is well-versed in the latest JavaScript and Cloud technologies. The Software Engineering Manager will be responsible for building and managing a team of Software Engineers and ensuring all business applications are built to a high technical standard.

### **Responsibilities**

Understanding business requirements and acting as a software architect, identifying the technology needed to provide high standards of system architecture and design.

Developing high-level product specifications with attention to system integration and feasibility.

Supervising and overseeing the technical aspects of multiple projects.

Being able to explain highly complex technical messages to non-technical stakeholders.

Growing your development and engineering team.

Developing and implementing technical strategy.

Leading daily operations of the development team, assisting and developing your team members' technical capabilities, developing best practice methodologies to improve team

productivity, and conducting performance reviews.

Providing mentorship and knowledge sharing to junior members.

Working across functional teams and entities to ensure products' success.

## **Requirements**

At least 5+ years of experience in software development with a minimum of 2+ years in the management role.

Excellent knowledge of software and application design and architecture.

Experience developing IT and cloud infrastructure in large-scale projects.

Experience coding in various languages (React.JS, Node.JS, and more).

Experience in agile software development and cross-functional team environments.

Familiarity with Jira or other project management tools.

Passion for cutting-edge technology.

Sense of ownership in individual performance and its impact on the company's success.

English proficiency is a plus but not required.

If this role as the Software Engineering Manager sounds of interest and you would like to have a casual discussion to learn more, please apply with your most up-to-date CV as we are short-listing immediately.
